LE-MAC NURSERIES

HAMPTON, VIRGINIA

Dear Garden-Lover:

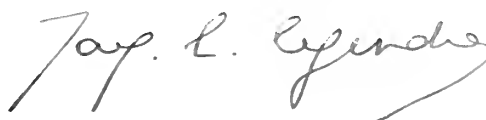

We have a lot of new plants which you ought to know about. Perhaps you do, and perhaps you have been wondering where on earth you could get them. From time to time you read or hear enthusiastic reports about interesting new plants, only to discover, to your disgust, that it is impossible to obtain them.

Few nurseries bother to ferret out rare new things and propagate them. That is why we undertook the job. We have close relations with hybridizers and discoverers both abroad and in America, and we make it our business to obtain and multiply the good things.

If you will study the list of plants on the back of this letter, we are sure you will find many items to interest you, some of which are utterly unobtainable from any other source in America.

We have an intense personal interest in these rare new things and will welcome correspondence concerning both those that we offer and others about which you may be curious. We want you to consider our firm a reliable source of newly introduced plants.

Yours very truly,

A GENERAL VIEW OF THE LE-MAC NURSERIES SHOWING THE CAREFUL MANNER IN WHICH THE YOUNG PLANTS ARE NURSED ALONG UNTIL THEY ARE BIG ENOUGH TO BE MARKETING

The Home of Unusual Plants

A PANORAMIC VIEW OF THE LE-MAC NURSERIES AT HAMPTON, VIRGINIA

Situated in one of the most fertile spots in America, the LE-MAC NURSERIES enjoys a long growing season which assures sturdy, well-ripened plants, and permits us to propagate rapidly the new and excellent varieties of shrubs and trees of which we are so fond. We have rigidly refrained from going into a wholesale growing of ordinary material, and confine our entire effort to searching out and

testing new plants. Such that prove themselves worthy, we put into immediate propagation. The pictures on this page show a portion of our Nurseries and a few of the interesting plants of which we have large stocks. The list on the back offers many things which are less common even than these, and you will find it highly interesting and profitable.

The Cotoneaster above is HORIZONTALIS with glossy foliage and brilliant berries.

The Azalea in the corner is HINODEGIRI, brightest of them all.

The various Heathers, CALLUNA VULGARIS, are superb rock-garden plants.

The Beauty Bush, KOLRWITZIA AMABILIS, is a stunning novelty.

The Cotoneaster above is SALICIFOLIA FLOCCOSA, the only tall-growing evergreen Cotoneaster hardy in New England. Flowers pure white; berries bright scarlet.

The evergreen shrub in the corner is BERBERIS JULIANÆ, one of the best of E. H. Wilson's introductions from China.

RETAIL PRICE-LIST

	Each	10	100
AZALEA amcna. Low-growing, bushy.			
Rosy purple flowers. 8 to 10 in.	\$1 00	\$9 00
